

Estimating your dental care costs is simple

Make planning for dental care costs easy, with pre-treatment estimates and our cost estimator tool.

Pre-treatment Estimates

Asking your dentist for a pre-treatment estimate* from Delta Dental before you agree to receive any recommended major treatment, lets you know up front what the plan will pay, and the difference you will be responsible for.

A pre-treatment estimate is useful for costlier procedures such as:

- Crowns
- Wisdom-tooth extractions
- Bridges
- Dentures
- Periodontal surgery

When your dentist submits a pre-treatment estimate to Delta Dental, Delta Dental will send them an estimate of your share of the cost and how much Delta Dental will pay.

Dental Care Cost Estimator

Our dental care cost estimator provides estimated cost ranges for common dental care needs. Our cost estimates reflect the range of fees charged by dentists in your area, both in and out of our dental networks. Remember you will receive the greatest out-of-pocket savings if you see a Delta Dental PPO™ provider.

Using the dental cost estimator*:

1. Log in to your member account at deltadentalco.com or the Delta Dental mobile app.
2. Click on the Cost Estimator tab.
3. Enter the required information: Zip code, treatment category, and dentist last name.
4. To obtain cost information for a specific procedure, contact your dentist directly for a pre-treatment estimate.

*The cost estimator or pre-treatment estimate are not a guarantee of payment. When the services are complete and a claim is received for payment, Delta Dental will calculate its payment based on your current eligibility, amount remaining in your annual maximum, and any deductible requirements.
